Kadant Lamort is Kadant Center for Stock Preparation for Virgin and Recycled Cellulose Fibre used in packaging, printing, writing, tissue and special grades.

Kadant Lamort’s Stock Preparation activity was established in 1908 and is focused on the development of equipment and systems and on their marketing, manufacturing and servicing in and outside Europe.

Through an international network, Kadant Lamort has become, within the papermaking industry, one of the key participants in global interchanges for stock preparation equipment and systems.
### Innovative solutions by proven experts

Kadant supplies a range of systems for stock preparation, sheet formation, fabric conditioning, water filtration, and doctoring. Our website has more details on our products and services.
